

## ABSTRACT

A telephone connection is complemented with additional information by, after initiating the telephone connection between a transmitting telecommunication device and a receiving telecommunication device, composing, at ~~said~~ the transmitting telecommunication device, a signalling message (200) of predetermined form to be transmitted in association with ~~said~~ the telecommunication connection. ~~Said~~ The signalling message contains the additional information—(207). Within ~~said~~ the signalling message there is indicated—(204, 205, 206) the intended receiving part within ~~said~~ the receiving telecommunication device of at least part of ~~said~~ the signalling message. The signalling message is transmitted from ~~said~~ the transmitting telecommunication device to ~~said~~ the receiving telecommunication device.
